Research Interests

I am an M.S./Ph.D. student at the Visual Information Processing Lab, Seoul National University, advised by Prof. Joonseok Lee. My research focuses on video understanding, with an emphasis on modeling temporal dynamics and high-level semantics in long-form videos. I am especially interested in building reliable multimodal representations for downstream tasks such as video summarization, video retrieval, and motion-related understanding.

Education

Seoul National University, Seoul, Republic of Korea Mar 2026 – Present
M.S./Ph.D. Student

Sungkyunkwan University, Suwon, Republic of Korea Mar 2022 – Feb 2026
B.S. in Applied Artificial Intelligence
◦ GPA: 4.29/4.5 (Overall), 4.46/4.5 (Major); graduated *magna cum laude*.

Publications

Anisotropic Representations Improve Planning in JEPA World Models 2026

^{*}Equal contribution. [†]Corresponding author.

Experience

Seoul National University, Seoul, Republic of Korea May 2025 – Mar 2026
Full-time Research Intern (Advisor: Joonseok Lee)
Visual Information Processing Lab [🔗](#)
◦ Conducted research on multimodal video summarization and long-form video understanding.

Graduate School of AI at KAIST, Seoul, Republic of Korea Aug 2024 – Oct 2024
Full-time Research Intern (Advisor: Beomjoon Kim)
Humanoid Generalization Lab [🔗](#)
◦ Conducted research on robot planning using 3D representations and large language models.

Sungkyunkwan University, Suwon, Republic of Korea Dec 2023 – Jul 2024
Part-time Research Intern (Advisor: Yusung Kim)
Computer System Intelligence Lab [🔗](#)
◦ Conducted research on robot foundation models using diffusion models.

Honors & Awards

LG AI Research President's Award (2nd Place) <i>LG Aimers 9th Offline Hackathon</i> Developed an AI model to predict pitch-control success probabilities.	<i>Sep 2026</i>
Presidents' Awards, Korea East-West Power and GS E&R <i>3rd Wind Power Generation Forecasting AI Competition (BARAM 2026)</i> Developed an AI model for wind power generation forecasting.	<i>Sep 2026</i>
Best Research Award <i>SKKU IME Annual Research Review</i> Top-rated research selected by industry and government-funded institute evaluators.	<i>Nov 2025</i>
Excellence Award (Korea Energy Agency) <i>Power Consumption Forecasting AI Competition</i> Developed a power consumption forecasting AI model.	<i>Sep 2025</i>
President's Award, Institute for Information & Communications Technology Planning & Evaluation (IITP) <i>Institute for Information & Communications Technology Planning & Evaluation</i> Developed paragraph-level classifiers for reliable detection of human-written and AI-generated text.	<i>Aug 2025</i>
Intelligent Multimedia Research Center Director's Award <i>Sungkyunkwan University</i> Developed prompting and retrieval-augmented generation strategies for fair, neutral responses.	<i>Jun 2025</i>
Minister of Employment and Labor Award <i>LG AI Research</i> Developed an AI model to predict the likelihood of pregnancy success in infertility treatment.	<i>Apr 2025</i>
Sungkyunkwan University brAIn Research Program Award <i>Sungkyunkwan University</i> Conducted research on CoReaP, an image inpainting model using collaborative reconstruction with assistive priors.	<i>Feb 2025</i>
President's List, High Student Success Performance <i>Sungkyunkwan University</i> Selected as one of the top 20 students for outstanding achievement across the university.	<i>Jan 2025</i>
Korea Water Resources Corporation President Award <i>K-water</i> Developed an AI model to detect abnormal timing and leakage sections in water supply networks.	<i>Dec 2024</i>
Korea Agro-Fisheries Food Trade Corporation Award <i>Ministry of Agriculture, Food and Rural Affairs</i> Developed an AI model for agricultural price forecasting.	<i>Nov 2024</i>
Korea Computer Education President Award <i>The Journal of Korean Association of Computer Education</i> Developed a text-to-3D motion generation model and rehabilitation exercise web application.	<i>Oct 2024</i>
Hankuk University of Foreign Studies Presidential Award <i>Hankuk University of Foreign Studies</i> Developed an AI model that classifies news categories from titles and text keywords.	<i>Oct 2024</i>
SKKU University AI Director Award <i>Sungkyunkwan University</i> Developed an AI model to detect illegal gambling advertisements on web pages.	<i>Sep 2024</i>
National Institute of Korean Language Award <i>National Institute of the Korean Language</i> Developed an AI model to distinguish conversational context in Korean large language models.	<i>Aug 2024</i>
Minister of Science and ICT Award <i>SW-Centered University</i> Developed an AI model to detect AI-generated fake voices.	<i>Aug 2024</i>
Dean's List Award, High Scholastic Achievement <i>Sungkyunkwan University</i> Ranked in the top 1% for the Fall 2023 semester.	<i>Jul 2024</i>

Scholarship

Presidential Science Scholarship <i>President of the Republic of Korea</i> Selected as one of 60 recipients nationwide to support the development of world-class scientists in engineering.	<i>Feb 2024</i>
